

High power transformers – High current chokes – High power filter

The company HEOL develops in close cooperation with the customers customized solutions. The quality goods are manufactured according to the current standards and customer requirements in Germany. The latest development tools, manufacturing and testing components guarantee the highest quality.

Version:	Three phase high power transformers up to 1.000.000 VA Electromechanical voltage stabilizers up to 500.000 VA High current chokes up to 10.000 A
Weight:	up to 3000 kg
Connections:	Copper busbars, terminals or customized cables
Cooling:	Air cooling or water cooling
Mounting version:	open IP 00, housing IP 23, customized
Application:	Oil- and gas industry offshore, solar power plants, wind turbines, rail technology
